Resources for students

Study FAQs

Find answers to common questions about research and assignments support.

Copyright advice

Learn what you need to know about copyright as a student.

Book purchase request

Make a request for books, e-books, standards, audiovisual material, journal titles and databases.

Support for students with disability or neurodiversity

If you are an RMIT student with a disability, the library is here to help, with a dedicated librarian and multiple resources.

More helpful resources

Academic integrity

Learning Lab (platform)

Writing and Learning Centre

Peer-Assisted Learning (PAL)

Citing and referencing

Learn the difference between citing and referencing, why it matters and correctly cite all your information

sources in a reference list.

Referencing

This resource is essential to your studies and also explains why you need to reference. The link leads to the RMIT Australia library.

Referencing

Easy Cite

Easy Cite is a reference tool that lets you look up referencing tips and examples in a selection of common styles used at RMIT.

Easy Cite guide

Endnote guide

EndNote is reference management software that assists with organising references, creating bibliographies and collaborating by sharing libraries.

Go to Endnote guide

Mendeley guide

Mendeley is a free academic reference manager tool. This start guide will provide you with information on how to create your account, build up your Mendeley Library, and use the MS Word plugin to insert citations and references.

Workshops for essential library skills

Our online workshops cover a range of skills such as research, referencing, academic integrity, evaluating information and using referencing tools such as EndNote and Mendeley. (Links to an external Sharepoint site, your RMIT login ID is required)

Library skills workshops

Generative artificial intelligence resources

Val GenAI Chatbot

Val is RMIT's generative artificial intelligence tool. It's like ChatGPT, but private, secure and free for RMIT students to use.

Generative AI for students at RMIT module

This module is designed to help you understand how to use AI in your studies appropriately and effectively.

How to reference artificial intelligence (AI) in assessments

Learn how to correctly acknowledge and reference all AI-generated content used in your assessments.

Need help with finding information for your assignment?

When you contact us, we will:

Ask

you questions about what you are studying, your assignment question, and what search strategies you've already tried if you are looking for information.

Advise

you on effective search strategy to help you find relevant and quality information for your assignment.

Refer

you to other teams in the Library, or elsewhere in RMIT, if we cannot help you directly.

Liaison librarians can help to

Find materials for your assessments

Evaluate your sources

Assist with citing and referencing and how to use referencing tools

Help you understand how to use generative AI tools in your learning and how to evaluate AI-generated content.

Talk to a librarian

Chat online with a librarian

Book an appointment online or on campus
